

Vrinda Store Sales Analysis Report – 2022

Objective:

The objective of this analysis is to understand customer behavior, sales trends, and performance across different dimensions for the year 2022. These insights will help Vrinda Store make data-driven decisions to improve sales and target the right customer segments in 2023.

Key Insights:

1. Sales & Order Trends:

Sales and order volume increased from January to March, reaching a peak in March. After March, both sales and orders showed a gradual decline until December.

2. Peak Performance Month:

March recorded the highest sales and number of orders, making it the best-performing month of the year.

3. Customer Demographics:

Women contributed **64%** of total purchases, while men contributed **36%**, indicating that women are the primary customer segment.

4. Age Group Analysis:

Adult customers contributed the highest number of orders. Among them, adult women formed the largest customer group.

5. Order Status:

- 92% of orders were successfully delivered
- A small percentage were cancelled, returned, or refunded

This indicates strong operational efficiency.

6. Top Performing States:

The highest sales were generated from:

- Maharashtra
- Karnataka
- Uttar Pradesh
- Telangana

- Tamil Nadu

These states are key revenue contributors.

7. Sales Channel Performance:

Amazon contributed the highest share of sales (~35.5%), followed by Myntra and Flipkart. This shows that online marketplaces play a major role in sales.

8. Product Category Insights:

Categories such as **Set and Kurta** are among the highest selling, indicating strong customer preference for these products.

Recommendations:

- Focus marketing efforts on **women customers**, especially adults
- Strengthen presence on **Amazon and Myntra**
- Target high-performing states for promotions and expansion
- Plan campaigns around peak months like **March**
- Maintain strong delivery performance to ensure customer satisfaction
- Focus on popular categories like **Set and Kurta**

Conclusion:

The analysis highlights that women, particularly in the adult age group, are the primary drivers of sales.

With strong performance in specific states and channels, Vrinda Store can further optimize its strategy to increase sales and customer engagement in 2023.
